

**Pick Up Your Name Tent & Sit
In an Area Corresponding to
Your Current Career Goal!**

**Sit Next To Someone
You Do Not Already
Know Well!**

Welcome to Bio 40C!

Jeff Schinske ("Shin-skee"), he/him

Relax and make yourself comfortable!

Meet 3-4 people you do not already know well!

1. Name
2. Career Goal
3. What inspires you to pursue that career
4. Next steps you will be taking to pursue that career
5. Challenges you have or anticipate in pursuing your goals

What will you be able to do?

After class, you will be able to:

- Feel confident that you have a path to understanding A&P and succeeding in Bio 40C.
- Evaluate prior knowledge regarding the digestive system, including connections between digestion and previously studied organ systems.
- Explain medical recommendations related to antacids and pain relievers based on chemical interactions in the stomach and surrounding organs.

Our Broadest Goals for Bio 40C...

What do you think will be most important for you to take away from Bio 40C for you and your future?

Our Goal: Authentic & Lasting Learning Working Hard

Changing your brains (learning) requires hard work! This includes:

- Being Confused
- Making Mistakes
- Practicing Together
- Respectfully Disagreeing & Challenging One Another

Our Goal: Authentic & Lasting Learning Working Hard

Working Hard does not mean:

- Knowing All the “Right” Answers
- Earning 100% of Class Points
- Having Surprise/Trick Questions
- Being Stressed & Always Feeling Out of Your Comfort Zone

This is your home for all things Bio 40C with Jeff Schinske. My goal is to support *all* students in reaching their goals and succeeding in class. I look forward to serving you in pursuit of that outcome! I understand this quarter is unique and we all have a lot on our minds besides Bio 40C. In addition to meeting our A&P learning goals, I think a major goal this quarter is for us to build a supportive and inclusive community that will help sustain us in these challenging times.

My website includes information about my background and teaching philosophies and can be viewed by [clicking here](#).

Foothill offers a bunch of great, **free services**, including free food, health services, psychological services, tutoring, and group study rooms. See the links on [this page](#) for more info!

Please check this Canvas frequently to stay up to date on course activities and due dates. Especially pay attention to the lists of "**To Do**" and "**Coming Up**" items on the right hand side of this page. Click on the assignment names in those lists to see instructions and complete the activities.

Thanks very much and never hesitate to let me know if I can help out!

Jeff

Establishing Our Perspective On Health & Disease

What are some things that might happen to you if you start a new routine of vigorous exercise?

Overarching Goal: Develop a Cellular/Molecular Perspective of the Body in Health & Disease

Possible General Public Response: Core Muscles

Possible A&P/Health Scientist Response: Damaged Myofilaments

As we begin with the digestive system, let's consider the food someone ate...

Pretend a friend of yours, Llesenia, ate an apple this morning.

- **What happened to the chemicals in that apple in Llesenia's body?**
- **Where did the chemicals from the apple end up when Llesenia's body was done with them?**

***To start with, what types
of chemicals does an apple
have in it???***

Chemicals in an Apple

Nutrition Facts

Apple ▾

Mechanical & Chemical Digestion

The Digestive System: Digestive Tract + Accessory Organs

Food in digestive tract is technically *outside* of the body. Materials do not enter body until the molecules are absorbed from tract into blood

Summarizing activities in the digestive tract

Pretend a friend of yours, Llesenia, ate an apple this morning.

- **What happened to the atoms of that apple in Llesenia's body?**
- **Where did the atoms from the apple end up when Llesenia's body was done with them?**

Llesenia's apple would go through mechanical and chemical digestion, but then what?

How could you relate what happens to Llesenia's apple to the following systems?

Nervous

Cardiovascular

Skin

Respiratory
