

Bio 40C.04 & Bio 40C.05: Human Anatomy & Physiology (A&P) III Fall 2023,

Foothill College

Instructor: Doug Woods

Email: woodsdouglas@fhda.edu

Course Credit: 5 Units

Schedule: Lectures Room 8402

Fridays (sections 12:00-1:50pm

Labs Fridays 9:00-11:50am (Section 5) or

2:30-5:20pm (Section 6)

Lecture Activities On [Canvas](#) (Asynchronous Weekly)

Location: Lectures – 8402 ([Campus Map](#))

Labs – Room 8710

****Ask for Help & Expect to Receive It!****

My Foothill colleagues and I are very excited to assist you in whatever ways we can! No question or request is too big or too small. Never hesitate to tell me and others at Foothill what you need to be successful, safe, and well!

Course Description:

My goal in this course is for every student to succeed in reaching our learning objectives and to excel academically. Everyone in this class has the potential to achieve great things. This course is the third in a three-part series specifically designed for students pursuing health careers, and we will cover a wide range of topics, including the digestive, urinary, immune, endocrine, and reproductive systems.

Our approach will emphasize making connections between the course content and your future career goals. Integrating cooperative learning and problem-solving into our class activities will create an environment where you can actively engage with the material. We'll also explore real-world scenarios, such as analyzing medical test results and discussing health-related dilemmas, to help make the content relevant and applicable to your future professional experiences.

Additionally, I'll encourage you to build on your prior knowledge, as this is a powerful way to deepen your understanding of new concepts. Together, we will explore these complex topics, aiming not just to meet our learning goals, but to exceed them.

Course Materials:

- Anatomy and Physiology, by OpenStax, available *for free* here: <https://openstax.org/details/anatomy-and-physiology> • One notebook, like a spiral notebook or composition book, for keeping lab notes (okay to keep electronic notes instead if you can create diagrams electronically – e.g., with a smart pencil)*
- One pack of 3x5 sized index cards (with or without lines, any color is fine)*
 - *I'll give you index cards and note paper if needed. Just let me know!
- Internet access and devices sufficient for independent online work (Foothill can provide support and funds through the financial aid office if that is needed!)

Grading:

I use the assignments and tests below for a variety of purposes beyond simply assigning grades. They are meant to encourage you to reflect on and critique A&P from a variety of different perspectives. They also give me valuable feedback throughout the quarter, allowing me to adjust the course to meet your needs. NOTE" Grading weight may be changed during the year.

Points Percent Description

20% Application Questions

20% Canvas Module Work, Case Studies, Scientist Spotlights, & Lecture Activities 80

10% Pre-Labs (8 Canvas assignments @ 10 pts. each)

10% Lab Activity Credit (9 days of lab activities @ 10 pts. each)

20% Lab Practical Tests (2 lab tests @ 70 pts. each)

20% In Lecture Exit Quiz and other Activities (Application Question Check @ 50 pts., "Final Exam" @ 120 pts.)

Total = 100%

Extra Credit: This course does not provide extra credit opportunities.

Course grades will be based on the percentage of total points earned:

A+ = 90 – 100% of total course points

B+ = 80 – 89%

C+ = 70 – 79%

D = 60 – 69%

F = < 60%

How will we practice what we learn on a regular basis? (application questions)

During most lectures or online modules, I will ask you to write down your thoughts in response to a problem. I'll review your answers, giving 10 points for well-supported responses, 6 points for partially-supported ones, and 3 points for incomplete answers. If you don't get 10 points initially, you can revise and resubmit your answers on Canvas to get up to 8 points. All application questions and grading rubrics will be posted on Canvas.

What will our online “lectures” involve?

Each week you will complete a “module” on Canvas representing your online lecture work for that week. The Week 1 module will introduce the format of these activities and their rationale in terms of supporting learning based on what is known about how the brain forms memories. Modules feature written reflections, quizzes, small group discussions, and application questions, alongside opportunities to discover content through readings or video clips. This means you are actively doing and submitting numerous activities during each module. Module activities are assigned following the Tuesday lecture each week and are due by 11:59pm on Sundays. You can complete each module in one sitting or in stages any time between Tuesday evening and Sunday night each week.

What should I know about the lecture test activities?

In addition to our regular lecture exit question quizzes, there will be 1 mid-quarter application test and 1 final lecture test. See the course calendar for the timing of these activities. You will receive test points in two ways: 1) I will randomly select some application questions to also count as test questions. If you have revised and received full credit for your application questions, you will *automatically* receive full credit for those test questions! 2) During our final exam meeting, we will work in groups to create new case studies. No advance preparation is necessary. I will provide more detailed test information the week before to each test activity.

What will the labs look like?

The week before each lab you will complete a brief prelab assignment on Canvas. The assignment will direct you to look at some pages in your book about our upcoming lab topic. You will then complete a short open-book quiz. You can retake these prelab quizzes as many times as you like with only your highest score counting. Prelabs are due at 9:00am on Tuesdays but remain open until 2:00pm those days (no credit available after 2pm Tuesday each week).

During lab you will work on activities outlined on lab worksheets provided on Canvas. You should either print out those sheets and bring them with you to lab or have access to them electronically in lab. During the activities you will record observations and answer questions on your own paper. You will receive lab activity credit at the end of each lab for successfully completing the day's activities with your team. Lab activity credit is not available for students who miss all or most of a lab period. However, extra credit activities are available to make up for part or all of the points from one or two missed labs.

Lab tests will happen twice during the quarter. During the lab tests, you will work collaboratively to complete tasks related to our weekly lab activities. I will provide additional information about lab tests the week before each test date. If you miss a test

due to illness or emergency, you should [contact me immediately](#) to notify me of the issue and schedule a make-up. Tests must be made up within 1 week of the original test date.

When will I reflect on my ideas and learn the origins of A&P discoveries?

It is important in studying A&P to examine where our knowledge of these topics came from and specifically who has contributed to that knowledge. As a part of some of your weekly modules, you will receive a writing prompt called a “Scientist Spotlight.” Through those assignments, you will be introduced to a scientist studying in an A&P-related field. By responding to the prompts, you will connect your biology knowledge to real-world dilemmas facing health scientists and identify further questions you have about our topics of study. These assignments also help us bring academic literature into the class for further discussion. When applicable, you will submit your responses to these prompts on Canvas as part of your module work. Partial credit (3 points) is available for Scientist Spotlight submissions up to 1 week late.

What types of assistance are available for students?

Foothill offers a wealth of resources to help you! For example, Foothill provides money for [technology purchases, housing, and food](#). We also have programs for [housing insecurity](#) and a [food bank](#). Information on free or low-cost health services can be found [here](#). We also have a staff of counselors and an array of [psychological services](#) available. See our Canvas site for links to additional resources and programs. I would be happy to personally introduce you to my colleagues in any of these programs!

Foothill College views disability as an important aspect of diversity and is committed to providing equitable access to learning opportunities for all students. Disability Resource Center (DRC) is the campus office that collaborates with students who have disabilities to provide and/or arrange reasonable accommodations

- If you have, or think you have, a disability in any area such as mental health, attention, learning, chronic health, sensory, or physical, please contact DRC to arrange a confidential discussion regarding equitable access and reasonable accommodations.
- If you are registered with DRC and have accommodations set by a DRC counselor, please use Clockwork to send your accommodation letter to your instructor and contact your instructor early in the quarter to review how the accommodations will be applied in the course. Students who need accommodated test proctoring must meet appointment booking deadlines at the Testing Center.

Exams must be booked at least three (3) business days/weekdays in advance of the instructor-approved exam date/time. • Finals exams must be scheduled seven (7) business days/weekdays in advance of the instructor-approved exam date/time.

- Failure to meet appointment booking deadlines will result in the forfeit of testing accommodations and you will be required to take your exam in class.
- Contact the DRC if you cannot find or utilize your MyPortal Clockwork Portal
- DRC strives to provide accommodations in a reasonable and timely manner, some accommodations may take additional time to arrange. We encourage you to work with DRC and your faculty as early in the quarter as possible so that we may ensure that your learning experience is accessible and successful.

Land Acknowledgement

Foothill College recognizes that it is located on the ethnohistoric territory of the ancestral and traditional land of the Puichon Thámien Ohlone-speaking People, and the successors of the historic sovereign Verona Band of Alameda County, presently identified as the Muwekma Ohlone Tribe of the San Francisco Bay Area. This land was and continues to be of great importance to the Muwekma Ohlone Tribe and other familial descendants of the Verona Band.

We recognize that every member of the greater Foothill College/Los Altos Hills community has, and continues to benefit from, the use and occupation of this land, since the institution's founding in 1957. Consistent with our values of community, inclusion, and diversity, we have a responsibility to acknowledge and make known through various enterprises Foothill College's relationship to Native peoples. As members of the Foothill College/Los Altos Hills community, it is vitally important that we not only recognize the history of the land on which we live, work, and learn but also, recognize that the previously federally recognized Muwekma Ohlone Tribal People are alive and flourishing members of the Foothill College/Los Altos Hills and broader Bay Area communities today. Aho!

Students Should:

- In all situations display tolerance and patience when interacting with classmates & instructor.
- Be open to learning in many different ways and trying new learning strategies.
- Approach me for help early and often, and provide me with candid, constructive feedback.
- Take responsibility for learning by staying attentive and organized.

Statement on Plagiarism and Cheating:

Students are expected to maintain academic integrity in all work pursued at Foothill. Cheating may, at the discretion of the instructor, result in the automatic disqualification of the test or assignment and the student receiving zero points for that test/assignment. Plagiarism, defined as either 1) *direct copying or loose paraphrasing of text or pictures from a published work or from an online source without appropriate referencing*, or 2) *use of another student's work or ideas without appropriate attribution*, will result in zero points earned for that assignment. While collaboration on coursework is acceptable and encouraged, every student must still submit responses in their own words. Assignment or test submissions that are entirely or largely identical are not allowed. Instances of plagiarism or cheating may be reported to the college administration for further action.

Student Learning Outcomes (SLO's):

- The student can analyze and evaluate the relationship between digestive system structure and function, and the role of the digestive system in maintaining homeostasis in the human body.
- The student can analyze and evaluate the relationship between urinary system structure and function, and the role of the urinary system in maintaining homeostasis in the human body.
- The student can analyze and evaluate the relationship between lymphatic system structure and function, and the role of the lymphatic system in maintaining homeostasis in the human body.
- The student can analyze and evaluate the relationship between endocrine system structure and function, and the role of the endocrine system in maintaining homeostasis in the human body.

- The student can analyze and evaluate the relationship between reproductive system structure and function, and the role of the reproductive system in maintaining homeostasis in the human body.

Biology 40C – Human Anatomy & Physiology Tentative Course Schedule*

Lectures: Tuesdays 12:00-1:50 (Room 8402), Labs: Tuesdays 9:00-11:50 or Tuesdays 2:00-4:50 (Room 8710) Required Online Lecture Activities & Prelabs: Completed Independently On Canvas

Date		Lecture Topics (Physiology)	Lab Activities (Anatomy)	Canvas Assignments
Sept	26	Introduction to Bio 40C & Digestion	Mechanical Digestion	<u>Week 1 Module Due Sunday 11:59pm</u>
Oct	3	Digestion & Metabolism Chapters 23 and 24	Chemical Digestion	<u>Week 2 Module Due Sunday 11:59pm</u>
	10	Urinary System Chapters 25 and 26	Urinary Anatomy	<u>Week 3 Module Due Sunday 11:59pm</u>
	17	Urinary System Chapters 25	Urinary Physiology	<u>Week 4 Module Due Sunday 11:59pm</u>
	24	Fluid & Solute Balance Chapters 26	Lab Test 1	<u>Week 5 Module Due Sunday 11:59pm</u>
	31	Endocrine System Chapter 17 Application Questions Chapter 17	Acid/Base Balance & Metabolism	<u>Week 6 Module Due Sunday 11:59pm</u>
Nov	7	Immune System	Endocrine System	<u>Week 7 Module Due</u>

		Chapter 21		<u>Sunday 11:59pm</u>
	14	Immune System Chapter 21	Lymphatic & Immune System	<u>Week 8 Module Due Sunday 11:59pm</u>
	21	Reproduction Chapter 27	Reproductive System	<u>No Canvas Module Due (Holiday Weekend)</u>
	28	Reproduction Chapter 28	Fertilization & Development	<u>Week 10 Module Due Sunday 11:59pm</u>
Dec	5	Reflecting on Bio 40C	Lab Test 2	<u>Week 11 Module Due Sunday 11:59pm</u>
	12	Finals Week Our Final = Tuesday, December 12, 1:00-3:00 in Room 8402		

*schedule subject to change if announced by instructor

Other Important Dates:

-
- October 4 – Last Day to *Add* Classes
- October 6 – Last Day to *Drop with No Grade* Recorded
- November 15 – Last Day to *Drop with “W”* on Record
